```

修正ユリウス日

Modified Julian Date

mjd!

```
# config/application.rb
module RailsTimez
  class Application < Rails::Application
    ENV['TZ'] = 'UTC'
    config.time_zone = 'America/Los_Angeles'
  end
end
```

mjd!

```
$ heroku run date +%Z
Running date +%Z ... up, run.1234
UTC
```

mjd!

```
> Date.today == Date.tomorrow  
=> true  
> Date.today  
=> 2016-04-12  
> Date.yesterday  
=> 2016-04-10
```

Ruby vs Rails (irb)

```
$ bundle exec irb -r timecop
> Timecop.freeze(
  Time.new(2016, 4, 11, 18, 59, 0, "-07:00"))
=> 2016-04-12 01:59:00 +0000

> Date.today
=> <Date: 2016-04-11 (...)>
> Date.yesterday
# undefined method `yesterday' for Date:Class
> Date.tomorrow
# undefined method `tomorrow' for Date:Class
```

Ruby vs Rails (rails c)

```
$ bundle exec rails c
> Timecop.freeze(
  Time.new(2016, 4, 11, 18, 59, 0, "-07:00"))
=> 2016-04-12 01:59:00 +0000

> Date.today
=> Tue, 12 Apr 2016
> Date.yesterday
=> Sun, 10 Apr 2016
> Date.tomorrow
=> Tue, 12 Apr 2016
```

Ruby vs Rails

```
$ bundle exec irb -r timecop  
> Timecop.freeze(  
  Time.new(2016, 4, 11, 18, 59, 0, "-07:00"))  
=> 2016-04-12 01:59:00 +0000
```

今日:

4月12日 (UTC +00:00)

4月11日 (PDT -07:00)

**Railsを知らない子は
Railsの設定
を知らない**

@jnchito

「 Railsなら

imeWithZon

を使う」

TimeWithZone

```
$ bundle exec rails c  
> Time.zone.today == Time.zone.tomorrow  
=> false  
> Time.zone.today  
=> Mon, 11 Apr 2016  
> Time.zone.yesterday  
=> Sun, 10 Apr 2016
```

TimeWithZone

```
$ bundle exec rails c  
> Time.now  
=> 2016-04-12 01:59:00 +0000  
> Time.zone.now  
=> Mon, 11 Apr 2016 18:59:00 PDT -07:00
```

今日:

4月12日 (UTC +00:00)

4月11日 (PDT -07:00)

ユーザー毎の タイムゾーン変 換

**※Pumaはマ
ルチスレッド**

タイムゾーン変換

```
Thread.new do
  ENV['TZ'] = tz
  time_str = time.strftime("%H:%M")
  :
end
```

タイムゾーン変換

```
$ bundle exec rake timezones:sys:travel
Traveling time ...!!!!
03:00 UTC became 22:00 in Japan (shuold be 12:00)
03:00 UTC became 03:00 in HST (shuold be 17:00)
03:00 UTC became 12:00 in EST (shuold be 22:00)
03:00 UTC became 17:00 in Japan (shuold be 12:00)
```

ENV['TZ']

**変えるのはス
レッドセーフじ
ゃない**

タイムゾーン変換

```

tzinfo**

Ruby Timezone Library

メンテナンス
大変じゃね？

**"search
for a
zoneinfo
directory"**

Zoneinfo directory

```
> require 'tzinfo/data'  
# LoadError: cannot load such file -- tzinfo/data  
> TZInfo::ZoneinfoDataSource::DEFAULT_SEARCH_PATH  
=> ["/usr/share/zoneinfo",  
    "/usr/share/lib/zoneinfo",  
    "/etc/zoneinfo"]
```

Zoneinfo directory

```
$ ls /usr/share/zoneinfo/
+VERSION      Cuba          GMT-0         MET           ROK
Africa/       EET           GMT0          MST           Singapore
America/      EST           Greenwich    MST7MDT       Turkey
Antarctica/   EST5EDT      HST           Mexico/       UCT
Arctic/       Egypt        Hongkong     NZ            US/
Asia/         Eire         Iceland      NZ-CHAT       UTC
Atlantic/     Etc/         Indian/      Navajo        Universal
Australia/    Europe/      Iran         PRC           W-SU
Brazil/       Factory     Israel       PST8PDT       WET
CET           GB           Jamaica      Pacific/      Zulu
CST6CDT       GB-Eire     Japan        Poland        iso3166.tab
